

25 FEBRUARY 2012

WARD COMMITTEESREPORT THAT IS COMING FROM WARD 39.

We are going to address on what did we do so far, To ensure that we serve our Communities as ward Committees.

Firstly: Last Year as Ward Committees of Ward 39 we replied from an sms that was coming from our Councillor Mr X Samona, saying that we must mobilised - We started to students who passed Matric, telling them that they must go to Municipality at Council Chamber about training that was concerning RICA. We decide to take two members into each branch to make 10 members that they were coming from Ward 39, and now they are still waiting for a response on what to do starting from this year 2012.

Secondly: We received another sms again from our Councillor saying that we must collect 20 Children starting from age of under 4 years to 2 years per - Sub-branch for toys that they were coming from Motsepo foundation. But still even now we as ward 39 Committee - members did not receive those toys we still waiting - for their response. Because we read on the paper - 26 November 2011 Daily Dispatch that Motsepo distributed to other wards like Mdantsane, Mlakaletaka, East London, Simbasa that made us wondering if we are going to get response from Motsepo distributed or not. We still waiting and those 100.00 kids from Ward 39 are the same

(2)

Thirdly On the 22nd November 2011 we received another sms from our Councillor saying that we must collect all the Students who are having Matric already especially those who did Maths and Physical Science to go to Social Development for Learnership we took 22 people per Subbranch, and they did go there together with their Certificates on their hands then they were captured to Social Development data. Then on the 8th of February 2012 we went to MR's Mkwankwa who is working at Social Development we wanted to check on how far are they about that Learnership. She said that those Students must wait until the selection is done so that they can be able to receive a call. These ones who are qualified for selection and she doesn't know their names. She was going to ask Mr Mbona the colleague that is responsible for selection, then after that she said that she is going to give us a call about a full information.

Fourthly:- On the 22nd November 2011 there was another sms again from our Councillor, saying that we must alert All the Tavern Owners of Ward 39 to go to Memorial Hall in King Williams Town at 10 am on the 23rd to attend the workshop about Owners of the Taverns, to teach them so that they can be able to come back and communicate with us about opening and closing time of their taverns.

Then The Fifth Time:- On the 23rd of November 2011 Our Councillor's ~~name~~ said that we must consult all the members of Ward 39 to attend meeting that was going to be on the 29th November 2011 at Kwalini location. Where by there will be a visitor that is coming from Social Development.

(3)

a Social Worker who was Mrs Mkwankwa she was going to brief us about project that they have for the Community,
- But she postponed the date for the 30th of November 2011
- But she came back on the 29th instead of the 30th she
- brief the few members of the Communities about that.
and now we are still waiting for the exact date. So that she can inform the whole Community. for this year.

- Then again on December last year there was a problem about
- water where by there was a lack of water into our
- branches then we managed to work together with those
- trucks who are supplying water. then they did manage
- to give us water by the time that we did not have water
- into our taps. again there was a problem about a youth
- who were stabbing each other then at the end someone
- was murdered that is where by we started to take a first
- step on how are we going to stop the Crime from
- continuing to happen. We invite the Police to brief us on
- what to take first step in terms of dealing with solving Crime.
- we managed all of that by contacting water trucks and Policies
- telephonically by using our own airtime and cellphones
- at the end they did manage to come to our Communities
- by responding on our phone calls.

Then This year Starting from January 2012. there was a family
at Ginsburg Lipote - that family lost their mother then they
- were end up being Orphan's who did not know what to do:-
- because there was no money to bury their own mother.
- Then we took the first step by going to Municipality asking
- them if they can be able to work together with us by giving
- those Orphan's a service in terms of giving them a graveyard

(4)

- so that they can be able to bury their mother. then again we go to Social Development asking them if they can help that family with food so that all the members that they came from the Funeral can be served after the funeral.
- so they did manage to do all of that then the service went well all of it. we did manage to do that as Ward Committees
 - by using our own money for transport to go to all these
 - departments who worked with us by helping these Orphans

- And then there was a problem again with another family they were Orphans to them they were and still even now not receiving food parcels and then so far there's no income because they renewed their social grant but still they are not receiving any money so there's no income. we did report that to Social Development when they did no respond we took further steps by going to our Ward 39 C.D.W. shes aware of all of that and about what is going on.
- but even now the C.D.W did not take any steps until now. we are still waiting because there's no income into that family. then we managed all of that by using our own money for transport when we were going to Social Development.

Then we organised a General Meeting about Grave Yards but the meeting did not go further because there were no enough Community Members to Corrate into that meeting there on 27 members it was on the 2ND February 2012 then we postponed it for Sunday. then again Members did not Corrate into that meeting, then again it was postponed on the 8th February it did Corrate. but there was no agreement with the Community members, they were adressed about the fact that

(5)

- There's no graveyard. and there's no land to bury dead people in graveyard. Community Members did not agree at all they said that they must have report about engkongkweni because they need to us that land instead of going to King William's Town.

- Then we have to go back to the Meetings that they were started last year December on the 15th 18th where by there was supposed to be a Co-opting about ward Committee Members then the Officials of Municipality were there to address on what steps there will be followed to ensure that the Co-opting of Ward Committee Member Succeed.

- Then January this year as Ward Committees together with our Councillor we were having a meeting with Helen August it was about problems dealing with Schools and the taverns that they were build next to Schools. Helen ensured us that that was not the right thing for the tavern to be next to School because the Learners are easily to be interrupted and end up not focusing well on their studies that Meeting was on the 10th of January this year. M.E.C. was here to know about how far away are we about those taverns because last year he reported was about them to be stopped about continuing to operate near School. they must be 100 meters away from Schools.

Then again on the 10th of February there was a launch about Karate we were invited to be there. Including our Councillor was there too. To see what is happening.

6) Then again on the 10th of this February we were invited
- by C.P.F's to gether with Sports Coordinators in terms
of having Sports and different kinds of Sports in our
Communities to recreate games so that youth
- together with our Parents of our Words can be
able to participate into sports. We did manage to
work with them because we as Ward Committees together
with Our Councilors want to Cooperate so that there
can be development and Success in Our Communities.

- Then there was an N.G.O who ^{Community} was Seth Siwey projects
- who Consult us as Ward Committees so that we can
- be able to identify those people who needs food Parcels
- we did manage to find those people and put them on
the list so that they can be able to get food parcels.
- The Socials worker's told us that we must take 5 members
into each ~~branch~~ of word 39 except Rheyi and Ginsburg
because they said that we must take 10 members
from Rheyi and 10 from Ginsburg. so all of that number
in one way it was 35 members for word 39.

- Then on the 20th of February 2012 these N.G.O's asked
us by giving us a test on Choosing those Houses who were
involved in disaster so for N.G.O Choose only Five
Houses from the list of Words 39 saying that they will
Come back soon for taking another list. For Kwelima and
Ngxwalene who has not been nominated at all.

- Then again as Ward Committees we used our airtimes and
- Cellphones to Consult Mobile Clinic so that they can be
able to come and help our Community Members
- the ones who are not be able to go to hospitals

(7)

in terms of dealing with health issues - we asked them if they can be able to come and serve our people into our communities, we are still waiting for their respond they said that firstly they need to sit down and come up with a solution on what day that they were going to be available to come and help the people of our communities in terms of dealing with health problems.

- Then on the 23rd we took loud hailer and used it to ask people of Ward 39 to come to the meeting that was going to be at town Hall about changing a logo.

- Then again we managed to go to people who are dealing and facing problems especially with TB's and grants - we did go to them and listen and writing down everything that they were talking about. So far we told them that we will get back at them.

SECRETARY C. MANANA

TOWN WARD COMMITTEE, NZWAKI FROM HUMAN
SETTLEMENT AND LUNATHI SERVICE PROVIDER
REASON LUNATHI TO RECTIFY HIS MISTAKE TO
THE COMMUNITY THAT HE EMPLOYED.

Wend 47

REPORT BY DIONNE LOVE LIQUOR TRADERS PORTFOLIO

Thus far the traders in Quigney, C.B.D and Southernwood have all been subject to fire department and Safety and Security scrutiny. Many of the outlets were deemed to be overcrowded and thus closed until the appropriate measures had been put into place. We had a B.C.M.L.T.F (BUFFALO CITY METRO LIQUOR TRADERS FORUM) meeting whereby the stakeholders and the various members of the Fire Department and the Safety and Security Department put their arguments forward. We were then instructed to include the following in all outlets:

EARLY DETECTION FIRE ALARMS:

All traders then consulted with their fire service companies and to our amazement we found that these particular alarms were very expensive and hard to come by. As the Chairperson of the Forum I found an alternative solution by contacting the C.P.F chair who introduced me to MAGNUM FIRE, who is now installing all the traders EARLY DETECTION FIRE ALARMS at a much more reasonable rate.

POPULATION CERTIFICATES

These certificates can only be obtained from the Fire Department who must come in and do a thorough inspection of the premises and measure per square meter the amount of people allowed into a specific area. For example one person per square meter. The fire department then determines the amount of people allowed within the venue and from there you supply them with a floor plan of your venue and fill in the necessary forms and they issue you with a population certificate which must be visible to all inspectors who visit your venue and should there be more than the prescribed amount you are liable for a COMPLIANCE NOTICE.

THUMB TURN LOCKS AND FIRE ESCAPE DOORS

All fire escape doors must open outward to allow easy exiting from a premises, these doors must be fitted with the prescribed thumb turn locks which open the door easily and allow escape. Larger venues with more than 250 people allowed in must have PANIC BARS on their doors to allow escape should a fire erupt.

We also invited the health department and they instructed us to do the following:

TOILET FACILITIES

All toilet facilities must have toilet paper, hand towel and soap a washbasin and the toilet, in the mens sections there must be a separate door closing off the toilet from the urinal facility. The toilet facilities need to be kept clean throughout the venues open period.

KITCHEN FACILITIES

In this instance it was found that some venues were not properly zoned for just a bar but needed to include a kitchen, these venues are in the process of adding the kitchen facilities to their premises. If you are going to use GAS to cook with then you would need the Fire and the Health Departments to give you a certificate to use the GAS facility and all units would also be stainless steel where the food is to be prepared. These kitchens are to be kept spotless and the Health department would inspect them from time to time to make sure.

LIQUOR LICENSES AND MANAGEMENT LICENSES

These licenses are granted by the Eastern Cape Liquor Board and subject to scrutiny by them and the SAPS liquor inspector at any time they deem fit.

SAMRO LICENSES

No venue may play music unless it is a jukebox which is already licensed by SAMRO, without a SAMRO license, this is becoming a problem as many outlets are not paying this license fee which is due annually. This license allows you to have entertainment in the venue and the license should be prominently displayed for the various inspectors.

REZONING OF BARS WITHIN RESIDENTIAL AREAS

We invited a speaker from the company SETPLAN who explained the necessary requirements for rezoning and departures for the different venues especially those that are (nuisance) venues in residential areas, venues can apply for a departure though it is not a fait accompli should this departure be turned down, this is at the discretion of TOWN PLANNING.

\ With this report I can say that Liquor outlets are trying to keep to the law and are thus far compliant with the necessary rules, however those that are in contravention are quickly corrected at these meetings as both the EASTERN CAPE LIQUOR BOARD and SAPS attend every meeting, from the ward council WARD COUNCILLOR JABAVU attends to advise us on by laws pertaining to liquor outlets.

WARD - 46
WARD COMMITTEE REPORT BY PERIOD
01-04-2012 TO 31-06-2012/18-09-2012

Attached herewith please find reports from area committees. But I wish to cite few things that we attended collectively.

On the 8th of April we attended a meeting at Westbank to address concerns of Westbank people that includes Bridge and Sewerage. Attendance register attached.

On the 26th July 2012 we had a public meeting, minutes attached herewith, and attendance register.

On the 15th of April we visited Leaches Bay school with the aims of wanting to know how far are the preparations of this, to move to Leaches Bay area as it is at some farm, where children had to take a scholar transport to go to school.

We were holding our monthly meetings as scheduled unless the meeting did not correlate then we postpone.

We do not have an office, that makes it difficult to attend to people

On the 8th August we attended an Exco Outreach at Robbie De Lange.

We attendend to Hamaa's who is wants to open a shop in Greenfields. Also attended to Chichi restaurant who wishes to get a liquor licence at Greenfields Pick & Pay Complex.

We attended to the clinic problem where a nurse was locked in by residents.

On the 10th August we had an invited an extended area meeting which is area committees and crime preventing forum. On the Agenda was owners of Orange Groove who allow renting people in their yard, and the electricity would blow because of overload, Foreigners who own shops, Houses without water.

We attended to a resident who died in the shack.

General Meeting WARD 6
8/July 2012
AGENDA

1. Opening & Welcoming - By Councilor Mbonwe
2. Apologies - Councilor Faku, Councilor Ngesi
3. Credentials - ~~circulating~~
4. Introduction - Been done by Councilor Mbonwe
5. Discussions For The day

5.1 Electricity -

- ① Houses - Time frame end of August / Steering Committee representative to be Appointed.
- ② Community Hall - Agreed by community
- ③ Refuse collection & Black bags.
- ④ Prisoners being taken out
- ⑤ Savares
- ⑥ Fire victims

Any other Business

Announcement of Deals

- ① Community hall issue was been discussed and the community members agreed but their concern is that the Security and the Management of the hall. And it has been said that the leadership will go and sit down and discuss this issue further and it will come back with full information.
- ② Electricity issue - Eludweni is a problematic area with this 'zinyoka' thing. But the speaker of the Mayor's office has confirmed that there's money that was put aside for installing electricity in the informal settlement. But there is a problem of shack closeness and the decision has been taken that the illegal connections must be arrested and be charged.
- ③ Refuse collections and plastic bags T.L.S are being hired so that the problem we facing workshop need to be done. Everybody must be responsible of cleaning. Plastic bags are going to be issued as soon as they being delivered. at the moment there's a filthy problem. so people has been

illegal dumping sites Speed
dumping.

Area Com. Meeting

Was this meeting held this month? No

If NO Why? (State reason) Area Committee not
yet elected.

If it was held what were the resolutions of the meeting?

The resolution was to organised

meetings and Action Plan in all issues.

N.B. Please attach minutes and credentials of the meeting.

Geographic Spread

Please provide a brief summary of all activities that took place this month in the following delivery aspects:

Electricity

How many outages that took place in your area this month? 6

The number of streets lights that are not working in your area NONE

How many houses that are not electrified in your area? NONE

Any further information that you can provide? Illegal installation of electricity to informal settlement is our main problem, resulting to many outages.

Water

Are there any leakages that have been discovered this month in your area? Yes or No

No

If yes where are they? (provide street and house no.)

N/A

Any further explanation?

N/A.

Sewage spills

Where are the spills? (if any provide street and house no.)

N/A

Refuse collection

Which day of the week is refuse collected? *Mondays*

How many times was it collected this month? *4 times monthly*

Was it collected on the day set aside for collection in that area? *yes*

What are other challenges identified (including dumping)

Crime rate is high, Shortage of Refuse bags. Time that the truck is to collect the refuse bags.

Interest Group Activities

What are your activities this month? Tick or put a cross in the box relevant to you.
